

Hello,

These are assignments done in R in Jupyter Notebook. They mostly demonstrate understanding of Econometrics, linear regression and hypothesis testing.

Microfinance loans and Global Warming

In part 1, it's code heavy but part two of this assignment about Global warming is based on understanding of Econometrics and hypothesis testing.

Legislations

This assignment was done to show the understanding of binary effects in linear regression. To show understanding of Marginal effect and to implement F test hypothesis and to test it.
